**Department of Health Services
Children's Medical Services Network
(CMS Net) - Information Bulletin # 43**

Good morning. First we would like to apologize for having to shorten the system availability yesterday, however, it was necessary in order to finalize the processing needed to bring San Diego County onto the CMSNet. That work has been completed and San Diego has become the 54th county to join the CMS Net family. Please join us here in Sacramento in welcoming San Diego to the system. With the addition of each new county, the system becomes stronger and more useful as a tool to help serve severely ill children and adults.

In conjunction with the San Diego conversion some system enhancements have been made that will soon be available statewide. We will continue to work with you all to enhance the operation of CMS Net and as always encourage your suggestions for improvement.
